(recent additions will be marked with a \$\$\$) the first clean presentation of modular arithmetic was published by carl friedrich gauss [the name rhymes with house] in *disquisitiones arithmeticae* (1801).. the basic observation is that any integer n belongs to one of m so-called residue classes modulo m . the residue class (or simply residue) of n is represented by the remainder (0 to $m-1$) obtained when we divide m into n .

hi harish! wow, your question is not a short one! basically gaussian uses the berny optimization algorithm which calculates all forces on every atom (i.e. which way and how strongly is each atom being pushed or pulled by the rest of the atoms) then it also calculates the gradient of such forces and allows them to be pushed -or pulled- just a little bit and repeats the operation until the sick with palpitations, chest pain, insomnia, dizziness... i managed to have smart meter installation delayed at my house, but suddenly became sick overnight with palpitations, chest pain, insomnia, dizziness, inability to concentrate and memory loss and fainting spells. i have a love/hate relationship with calculus: it demonstrates the beauty of math and the agony of math education. calculus relates topics in an elegant, brain-bending manner. my closest analogy is darwin's theory of evolution: once understood, you start seeing nature in terms of survival. you a prime number (or a prime) is a natural number greater than 1 that cannot be formed by multiplying two smaller natural numbers. a natural number greater than 1 that is not prime is called a composite number. example, 5 is prime because the only ways of writing it as a product, 1×5 or 5×1 , involve 5 itself. ever, 6 is composite because it is the product of two numbers (2×3) that a diy induction heater. this great little project demonstrates the principles of high frequency magnetic induction. the circuit is very simple to build and only uses a few common components. here is actually no real iq test online to the general public so other outlets making suggestions of what the highest iq possible is just opinion not actual fact yet opinions on the web tend to give the majority beliefs that nearly all possible information is online & that somehow most of it or at least more than half is fact.
